PROJECTS

CSS Playground - Interactive Learning and Code Generator

Project Lead | Backend Developer

Technologies: HTML, CSS, JavaScript, JQuery, BootStrap

- Developed an **academic project**, an interactive platform for real-time CSS experimentation and code generation, featuring styling modules and dynamic code previews (**initial version lacked responsiveness and user appeal**).
- **Updated version:** Improved UI/UX, enhanced responsiveness, and refined design to create a more visually appealing and user-friendly experience.

React Portfolio – Personal Developer Showcase

Developer

Technologies: React.js, JavaScript (ES6+), CSS3, HTML5, EmailJS, React Icons

- Designed and developed a **fully responsive portfolio website** to showcase projects, skills, and certifications.
- Integrated React.js for component-based development, EmailJS API for seamless contact form functionality, and React Icons for consistent and scalable iconography.
- Built reusable components with a modular architecture, ensuring maintainability and scalability.

CERTIFICATIONS & COURSES

- **Google Cybersecurity Professional Certification**
Google + Coursera
- **The Complete Full-Stack Web Development Bootcamp**
Udemy
